Publication Date: 2012

Country of Origin: United States

Format: Information Card

Physical Description: 2 p.: mono., tables.

Language: English

Abstract:

This pocket-sized drug treatment card for clinicians provides information on diagnosis of latent tuberculosis infection and therapy options and recommendations for infected patients. The 2012 revision incorporates new developments such as shorter regimens for treatment of latent TB infection and the use of interferon-gamma release assays (IGRAs).
